We create ideas with power!

Protection relay e²TANGO by ELEKTROMETAL ENERGETYKA SA has been developed by our Research and Development Team composed of engineers with vast practical knowledge and many years of professional experience in power engineering industry. Ideas and solutions which has been applied in e²TANGO are solving problems which our customers have to face every day. Finding solutions to this problems was our inspiration during our construction work. In result we have created an exceptionally friendly and intuitive e²TANGO protection relay for every day use which doesn't require an advanced introduction training.

We have designed a technically advanced device, universal in terms of software and hardware, dedicated to protection automatics, controlling, measuring, recording and supervising of MV and HV switchgear bays.

e²TANGO protection relay has a lot of interesting features but easy and convenient use are it's very special advantages. We intended to develop an extremely friendly and intuitive device for every day use, which can be applied in a system of intelligent power grids SMART GRID.

Versatility of e²TANGO enables it to be easily adapted to individual requirements and safe loads. We have strongly focused on safety because we know how it is important in the power industry. All our products, including the family of protection relays, have certificates confirming complete type examination carried out in the most demanding laboratories.

e²TANGO is an exceptional protection relay. We strongly believe it and therefore recommend it as a special one.

Dariusz Rybak
Chief Constructor, Head of Digital Development Department
Elektrometal Energetyka SA

APPLICATION

e²TANGO protection relay is an universal solution in terms of hardware and software. It is equipped in complete set of protection- and station- automatics and can be therefore applied in each kind of bay of various intended use and operation characteristics, eg. incoming-, line-, transformer-, incoming-outgoing-, measurement-, coupler-, capacitor-, wind power plants- bay etc for MV and HV power grid. Additional automatic transfer switch with auto re-transfer allows complete protection in powering the outflows in the objects which require continuous and guaranteed power supply.

wind power plant bay

- synchrocheck
- df/dt
- du/dt

motor bay

- thermal protection
- thermal sensors PT100/PT1000
- motor start-up protection

transformer bay

- thermal protection
- flux-gas protection
- 2nd harmonic restraint

line bays

- earth fault protection
- distance protection
- automatic frequency relieve of the system

capacitor battery bay

- internal current of capacitor battery
- automatic inclusion of capacitor battery

incoming bays

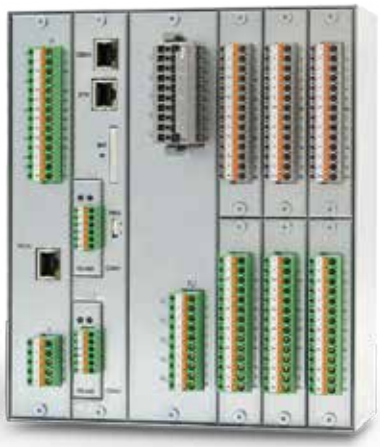
- ATS automation
- automatic bus-bar protection
- automatic breaker failure protection

ADVANTAGES OF THE PROTECTION RELAY

quick start
first run configuration assistant,
predefined synoptic scheme library,
predefined protective functions

trouble-free battery change
possible to change battery
without turning off the feeder

remote service acces
remote and local read of diagnostic data, allows to send data to manufacturer service



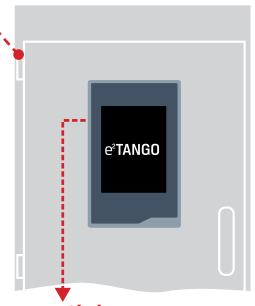
variety of expansion cards
modular construction
based on expansion
and communication cards,
up to 168 input and
up to 39 output

hot reserve
restoring within a few minutes functioning of the bay after fail, possibility to recover all bay data such as: settings, logic, events

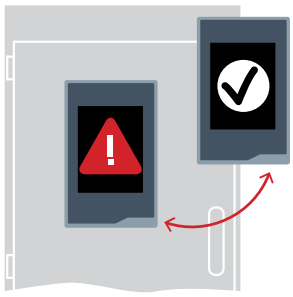
intuitive interface
clear menu layout,
graphic expression of
menu positions and
other designations

strong resistance to interference
up to 100% higher than
required by standards

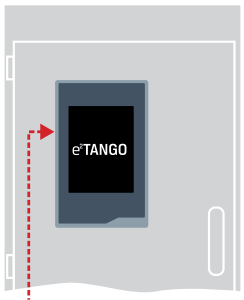
wide array of hardware configuration
main units with 6, 10, 14 expansion slots, avalible in
flush, wall and mixed mounting



continious
data backup



quick exchange
of broken hardware



data restoration

ADVANTAGES OF THE PROTECTION RELAY

Intuitive e²TANGO protection relay is equipped in fully configurable clear interface, extended configuration, recorders and measurement- functions. Good readability of indicators and signalization, easy access manual, easy verification of logic and graphical verification of protection characteristics as well as remote service access greatly improve everyday work with device.

ADVANTAGES OF THE PROTECTION RELAY WITH TOUCH PANEL

- alphanumeric keyboard
- touch control menu
- touch control for logic through fluent scrolling of diagrams
- screen buttons allowing use of bigger number of functional buttons as well as assigning them short-cuts option
- direct choice of switch for controlling from panel screen
- events scrolling on widget
- camera support

DESIGN

e²TANGO protection relay consists of two elements: operating panel and central processing unit. Central unit is manufactured based on expansion cards and is offered in three versions of metal housing: J6 (six cards), J10 (ten cards) and J14 (fourteen cards) – depending on switchgear's bay configuration complexity and the needs of the user. Operating panels e²TANGO-600 i e²TANGO-800 in big, good readable, 6-inch colour screens. Operating panels e²TANGO-1000 i e²TANGO-1200 have 7-inch, colour touch screens. Panels (depending on the version) are equipped in number of buttons allowing device control.

For small-size switchgears there is possibility to use a set of protections with the smallest available on the market operating panel e²TANGO-600 or e²TANGO-1200 with the external dimension of only 147x235 mm. Despite the small external dimension the panels are equipped in 6- or 7-inch screens, which allow displaying of any configuration, measurements, diagrams or graphs.

* Detailed information in e²TANGO TYPES, page 13.

PROTECTION FUNCTIONS

50/50N	short-circuit / ground short-circuit instantaneous
51/51N	overcurrent / ground overcurrent delayed 3-stage
50HS	accelerated action of protection automation
51	inverse overcurrent (IEC/IEEE characteristic or user customized)
60/67N	overcurrent / ground overcurrent directional
49/51	thermal overload
46	phase-balance or reverse sequence current protection
37	undercurrent
32P	reverse active power
32Q	reverse reactive power
51VN	ground overcurrent with voltage interlock
59	over-voltage with two stages [with option for phase voltage or line voltage
27	under-voltage with two stages (with option for phase voltage or line voltage)
81H	over-frequency
81L	under-frequency
81R	rate of change of frequency df/dt
59N	zero sequence over-voltage
21N	admittance
21ND	admittance directional
64S	earth fault stator
66/86	motor start-up protection
66	limitation of motor starts
48	motor starting time supervision
50LR	locked rotor protection
25	synchronism check
87M	motor differential protection
30/74	flux-gas
49	thermal (digital or analogue input 4-20 mA)
74TCS	continuity of control circuits
50C	overcurrent of capacitor bank
AFP*	arc protection (cooperates witch arc detectors)

* - not mentioned on ANSI code list

AUTOMATION SYSTEMS

- Accelerated protection action automation system
- Automatic load shedding equipment
- Automatic releasing equipment with control of circuit breaker's position and possibility to determinate type of protection initializing stimulation of automatic restart
- Automatic breaker failure protection equipment
- Automatic capacitor battery activating equipment
- Automation of the system grounding zero point of the grid*
- Automatic active component forcing equipment
- Automatic bus-bar protection
- Automatic transfer switch with auto re-transfer
- Other based on programmable logic
- Synchrocheck

* in agreement with the producer

ATS AUTOMATION

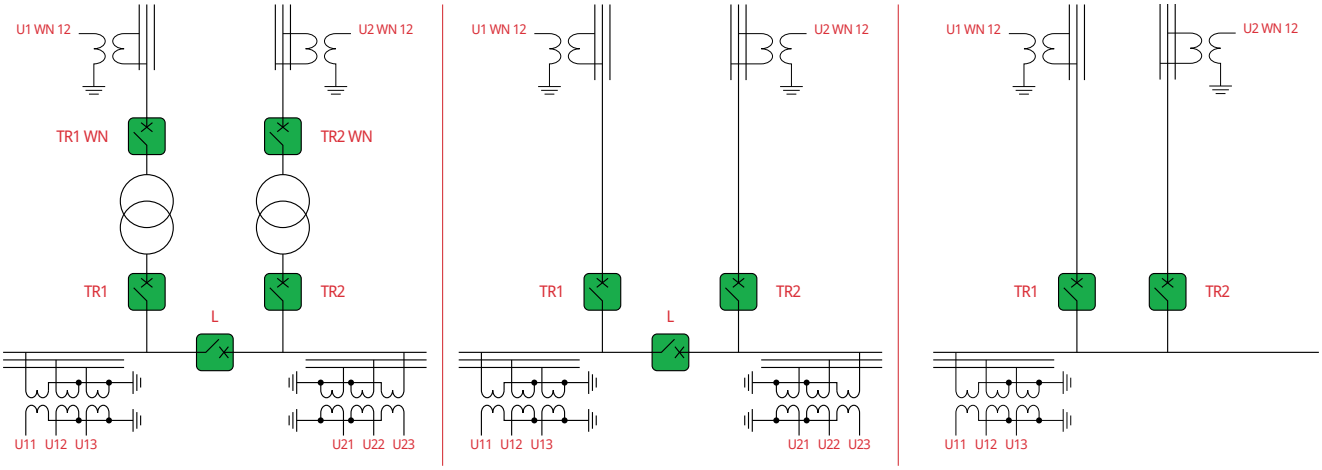
Controllers for automatic transfer switch with auto re-transfer - e²TANGO ATS have been developed on the base of e²TANGO controllers and supports the same features and functions. They are available in various configurations for LV, MV and HV network. Standard version allows implementation of automation in 1 or 2-sectional switchgears.

Controller features:

- explicit, implicit stand-by, automatic selection (based on the configuration of switches)
- fast and slow mode
- measurement of 6 phase voltages on the bus-bars and two wire voltages on the top side of power supply transformers or power lines,
- optional measurement of currents,
- optional re-transfer to the normal power supply,
- optional automatic locking of automation after operation,
- two communication ports RS485/optical fibre, Ethernet link to cooperate with the dispatch centre or engineering link. Support for Modbus RTU, Modbus TCP, IEC870-5-103, DNP3.0, Canbus, Profibus protocols.
- event recorder for 1000 events, recording all automation-, interlocks operations and emergency states.
- disturbance recorder recording the measured voltages with configurable recording time after triggering the recorder.
- planed power supply switching automatics (PSS)

Standard version of automatic transfer switch with auto re-transfer:

The controller in the standard version supports the 2-section switchgear with two transformers or two supply lines, with sections connected by a bus-bar connector or 1-section switchboard with two supply lines. In the case of 2-sectional switchboard the controller performs explicit and implicit automation with optional re-transfer to the normal power supply.



2-section switchgear with two transformers

2-section switchgear with two supply lines

1-section switchgear with two supply lines

Customized version:

In addition to standard solutions for automatic transfer switch with auto re-transfer we offer to develop special versions, tailored to individual customer needs. Dedicated systems are created in close cooperation between the R&D department and the client.

Examples of custom solutions:

- switchgear with three sections (e.g. 3 power supplies, 2 coupling)
- dedicated switching algorithms
- current measurements and analysis of power supply load.

EXPANSION CARDS

BASIC CARDS
- power supply
- processor
- supplied from supported contacts (HI 5A DC)

MEASUREMENT CARDS
- standard (5I+4U)
- synchrocheck (4I+5U)
- ATS (9U)
- optional measurement of analogue values by:
  - Rogowski coils
  - voltage sensors

FUNCTION CARDS
- 8 binary inputs
- 12 binary inputs
- 8 binary outputs
- 4 power outputs (possible to connect up to 10 A DC)

ANALOGUE CARDS
- 4 analogue inputs 0-10 V
- 4 analogue inputs 4-20 mA
- 4 analogue outputs 0-10 V
- 4 analogue outputs 4-20 mA

ARC DETECTOR INPUT CARDS
- 6 arc detector input with CAN communication
- 6 arc detector input passive

TEMPERATURE SENSORS CARDS
- 6 PT100 inputs
- 6 PT1000 inputs
- 3 outputs to measurement busbar temperature (TMP)

OTHER
- current metering card for differential protection

COMMUNICATION PORTS AND PROTOCOLS

- Ethernet
- Optic-SM
- Optic-MM
- Optic-PL
- RS485
- CANbus 2×
- USB 2.0
- WiFi*
- Modbus RTU/TCP
- IEC 60870-5-103
- DNP 3.0
- IEC 61850
- Profibus
- CANbus/PPM 2

* in agreement with the producer

RECORDERS

- event recorder, 1000 events
- disturbances recorder up to 160 s sampling rate 1,6; 3,2 kHz
- criterial recorder up to 600 s
- temporary value recorder, TrueRMS
- power factor recorder
- load profile recorder
- phasor diagram
- grid parameters analyzer

Criterial recorder example data

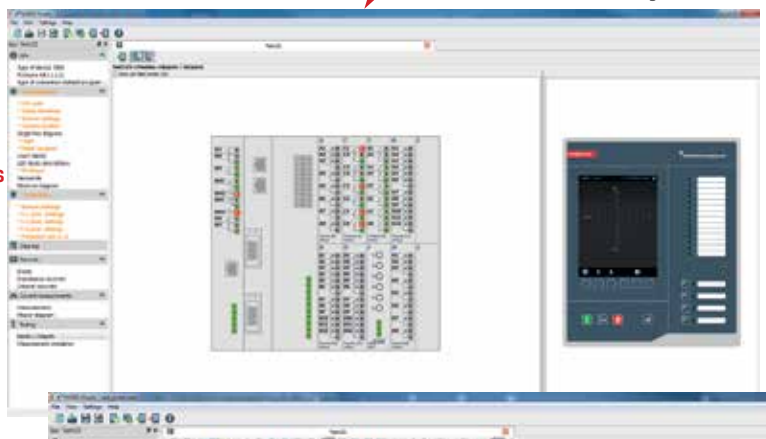
e²TANGO-STUDIO SOFTWARE

e²TANGO-Studio software intended to operate e²TANGO protection relay. It is at the same time configuration tool for the operating panel. This software has been equipped in extended set of functions, which are combined with clear graphic interface. Finally it creates great tool which supports every-day work and allows creation of projects for many devices, bays, switchgears and stations.

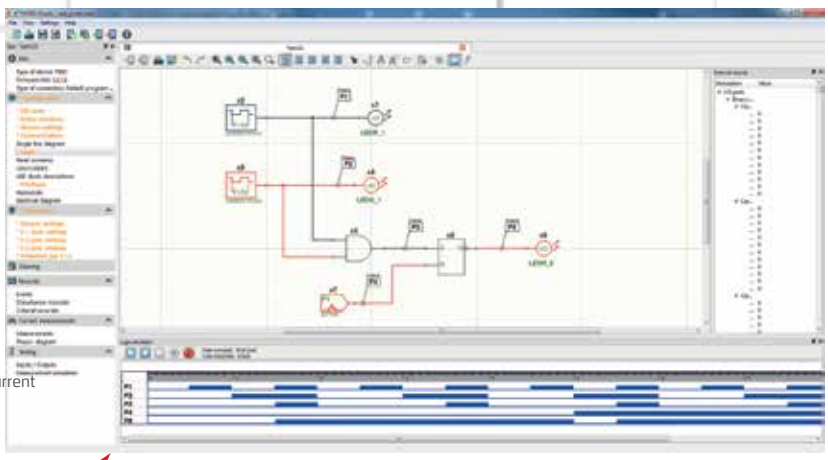
quick configuration assistant
helps first time users of the software and facilitates regular use

advanced design functions
ability to prepare device configuration for an entire switchgear on a PC and distribute it using USB



on-line preview
real-time preview of measurement input/output stat displaying actual LCD screen content

display conformity
preview of the actual panel screen



full status preview
access to all internal device and protection function statuses

visual characteristic modification
graphical and classic protection setpoint configuration

easy setpoint and selectivity verification
displaying setpoints of all related overcurrent protection functions on one chart

possible expansion using plug-ins

ultra-fast design of custom screens
drag&drop element placement

support for sophisticated logical dependencies
up to 210 logic gates / elements

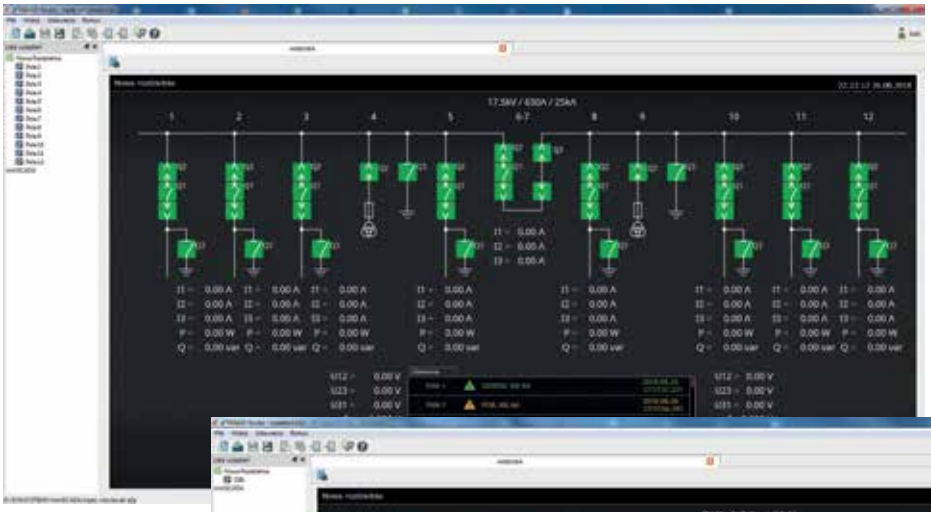
„miniSCADA" FUNCTIONALITY

e²TANGO-Studio has possibility to expend with "miniSCADA" functionality that lets you model state of switchgear, manipulate switches, alarms and events preview and online access to measured parameters of protection relay (e.g. current, voltage, power, energy) installed in switchgear. Functionality was designed to share engineering link (one communication port) to protection relays that lets you for prize optimization by wiring and infrastructure simplifying.

"miniSCADA" enlargement is optional as additional license.

intuitive configuration of screens
possible to use widgets

data transmission using available communication ports
RS485, OPTO, Ethernet i inne



cost optimization
no need to use advanced SCADA systems

universal software to all e²TANGO types

possible to work in any operating system

access from mobile devices

ADVANCED LOGIC EDITOR AND SIMULATOR

e²TANGO-Studio is characterized by advanced and extended logic editor which allows to perform logic simulation visible also on the panel level without device connecting. It gives possibility to view logic state while working with the device. It ensures easier project preparation as well as start-up and service of the switching stations. It allows to use non-standard logics dedicated to the specific customer's requirements.

TECHNICAL PARAMETERS

AUXILIARY POWER SUPPLY	
DC Voltage	110 V, 220 V (80-300 V)
AC Voltage	230 V (88-265 V)
Maximal power consumption (central unit with operating panel)	30 W (VA)
CURRENT MEASUREMENT CIRCUITS	
Rated current	5 A (1 A option)
Rated frequency	50/60 Hz
Measurement range for phase currents with current transformers with Rogowski coils	 0,05-150 A 5-140mV
Measurement range for current I_0	0,001-10 A
Measurement range for current I0 in feeder T_U	0,01-10 A
VOLTAGE MEASUREMENT CIRCUITS	
Rated voltage	57,7/100 V
Rated frequency	50 Hz
Voltage measurement range U, U_0	2-120 V
Heat resistance voltage 10s	150V
BASIC PROTECTION PARAMETERS	
Return coefficient for overload protections	Configurable
Return coefficient for under-load protections	Configurable
Operate time	typically 35 ms
Operate time for arc protection	⟨10 ms
ACCURACY OF MEASUREMENT	
I1, I2, I3 (0.1-150A)/5-1400mV	1%
U1, U2, U3, U0 (5-120V)	1%
I0 (0.001-10A)	1%
P, Q, EC, EB (U⟩5V, 0.1A⟨I⟨10A, 60°⟨ φ ⟨-60°)	1%
φ1, φ2, φ3, φ0	1°
BINARY INPUTS CIRCUITS	
Rated voltage	110/230 V AC/DC
Maximal power consumption: 220 V DC, 230 V AC	2 mA, 15 mA
BINARY OUTPUTS CIRCUITS – CONTROLLING CIRCUIT BREAKER	
Permitted voltage with opened contacts	250 V AC / 440 V DC
Closing circuit at 220 V DC	5,5 A
Opening circuit at 220 V DC (L/R = 0)	0,4 A
Opening circuit at 220 V DC (L/R = 40 ms)/PSU HI	0,3 A/5A(for PSU HI card)
BINARY OUTPUTS CIRCUITS – OTHERS	
Permitted voltage with opened contacts	250 V AC / 440 V DC
Long-term current-carrying capacity	5 A
Opening circuit at 220 V DC (L/R = 40 ms)/OUT HI	0,1 A/3A(for OUT HI card)
Opening circuit at 220 V AC (cos φ = 0,1)	2 A
ENVIRONMENTAL CONDITIONS	
Working temperature	-10 °C ... +55 °C
Storage temperature	-25 °C ... +70 °C
Relative humidity	5 to 95%
Vibrations and mechanical shock	Class 1 according to IEC 60255-21
Electromagnetic disturbance	Class B according to IEC 60255-26
SECURITY	
Electric strength of insulation	2 kV / 50 Hz / 60 s IEC 60255-27
Dimensions	
Weight (main unit/operating panel)	5 kg / 1 kg
Main unit size (height x width x depth, mm)	187/234/281 x 103 x 222
Degree of protection for main unit	IP 3X
Degree of protection for operating panel (front side)	IP 4X / IP 54

FORM INSTRUCTIONS

STEP 1

In the presented table there are the basic technical parameters of the e²TANGO protection relay. From each position marked with a numbers from 1 to 10 there is only one position to be selected. If you choose "other", in STEP 3 in the corresponding field, please enter the requested value.

Step 1 instructions

- ▢ - recommended basic configuration
- OPTO-MM - multi-mode optic fibre
- N1-wall mounting version 1
- N2-wall mounting version 2
- N3-wall mounting version 3

STEP 2

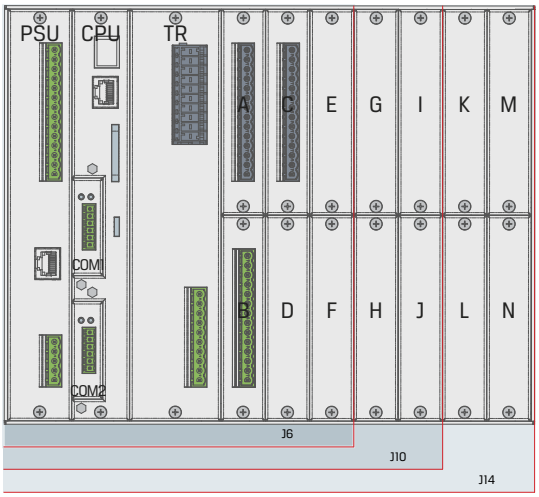
In the presented table there is a list of available expansion cards and their possible installation locations in the central unit of e²TANGO. Missing field ☐ for marking means that the card cannot be installed in a given place. Please choose from the list the ordered cards and mark with "X" a slot, in which they have to be installed. Arranging the cards has to be started from the A slot. Capacity of the units are marked appropriately with the background colour in the table.

Additional requirements have to be described in a designated area.

Step 2 instructions

- ▢ - recommended basic configuration
- max 4 cards 8OUT
- max 1 card AI10 or 1 card AI20
- max1 card AO10 or 1 card AO20
- max 1 card PT1 or 1 card PT10
- TRR card can be installed only in F slot
- ARP card can be placed in the device only if ARC card is already installed

View of the central unit indicating the arrangement of slots for expansion cards.



STEP 3

Selected above parameters of the e²TANGO protection relay have to be inserted in the corresponding space. The code created in that way together other requirements or scanned order form page has to be sent along with an order to the following address:
eaz@elektrometal-energetyka.pl

Example of e²TANGO protection relay configuration:

① e²TANGO-1000 panel	⑧ mixed mounting
② J10 main unit	⑨ 8 m cable
③ TR measurement card (measurement by core transformer and Rogowski coil)	⑩ IP4X protection level
④ rated current of measurement card 5A	⑪ Standard IEC 61850
⑤ universal binary input voltage	A slot A: 8IN card
⑥ OPTO-MM	B slot B: 8OUT card
⑦ RS485	C slot C: 12IN card
	D slot D: ARC card

Example of correct filled code:

e²TANGO	1000	J10	TR	5A	UNI	OPTO-MM	RS485	M	8	IP4X	E
8IN	8OUT	12IN	ARC
