FORM INSTRUCTIONS

STEP 1

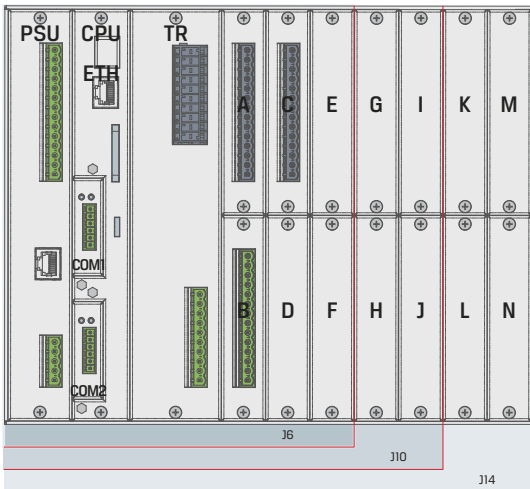

In the presented table there are the basic technical parameters of the e²TANGO-600, -800, -1000, -1200 protection relay. From each position marked with numbers from 1 to 10 there is only one position to be selected. If you choose "other", in STEP 3 in the corresponding field, please enter the requested value.

STEP 2

In the presented table there is a list of available expansion cards and their possible installation locations in the central unit of e²TANGO-600, -800, -1000, -1200. Missing field for marking means that the card cannot be installed in a given place. Please choose from the list the ordered cards and mark with "X" a slot, in which they have to be installed. Arranging the cards has to be started from the A slot. Capacity of the units are marked appropriately with the background colour in the table.

Additional requirements have to be described in a designated area.

View of the central unit indicating the arrangement of slots for expansion cards.

STEP 3

Selected above parameters of the e²TANGO-600, -800, -1000, -1200 protection relay have to be inserted in the corresponding space. The code created in that way together other requirements or scanned order form page has to be sent along with an order to the following address:
